

১.রাউট বানালাম:

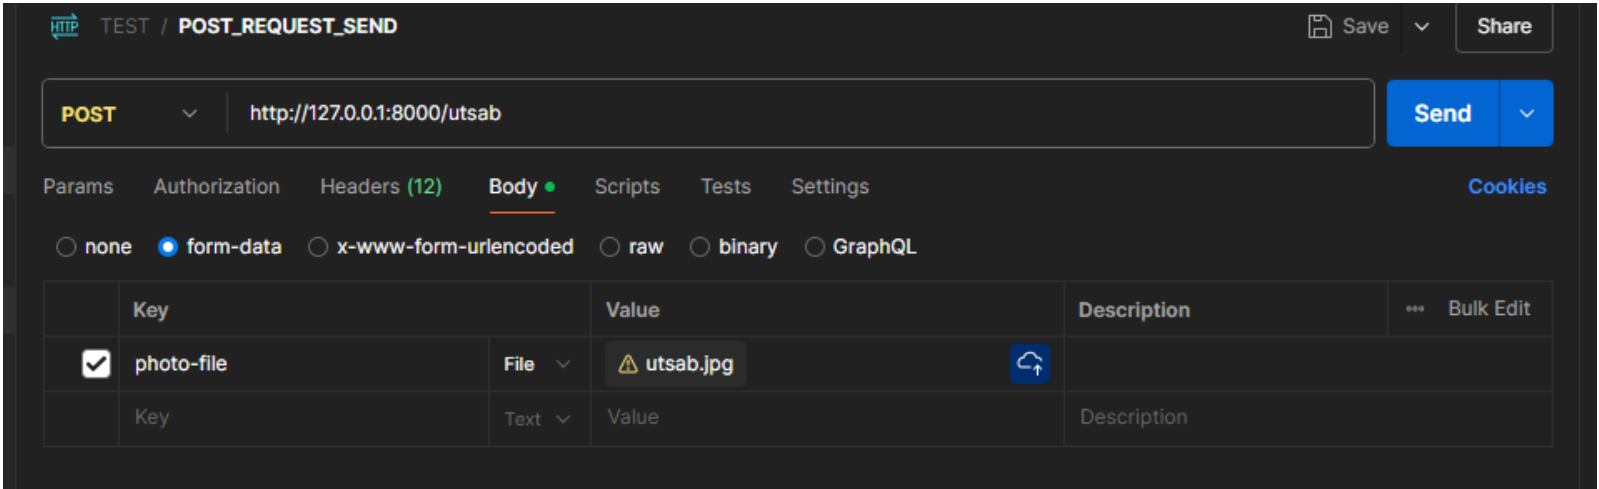

```
1  <?php
2
3  use Illuminate\Support\Facades\Route;
4  use App\Http\Controllers\FormController;
5  use App\Http\Controllers\RequestController;
6
7
8  Route::post('/utsab',[RequestController::class,'store_file']);
9
10
11
```

২.এরপর প্রেরণকৃত ফাইল public folder এ রিসিভ করব এবং public/uploads/profilePic ফোল্ডার এ ইমেইজ ঢুকাব।
ফোল্ডার না থাকলে নতুন করে তৈরি হবে।

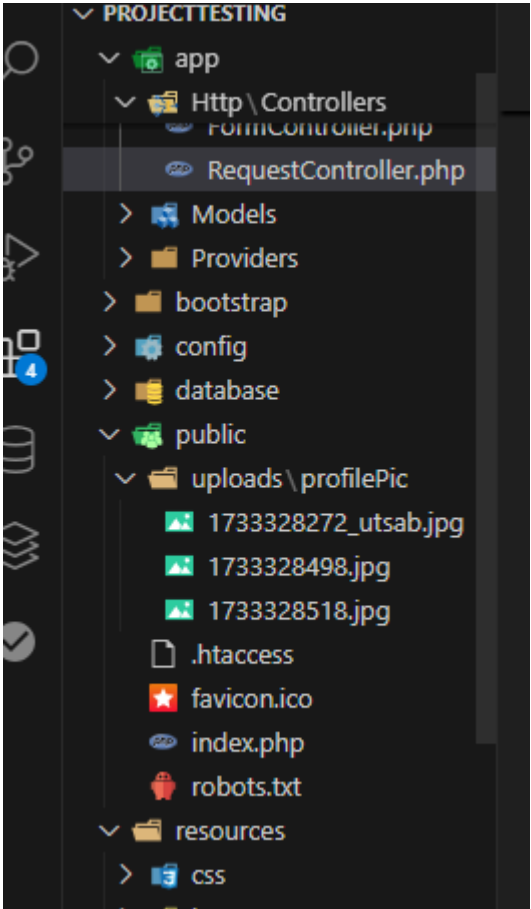

```
1  <?php
2
3  namespace App\Http\Controllers;
4
5  use Illuminate\Http\Request;
6  use Illuminate\Support\Facades\File;
7
8  class RequestController extends Controller
9  {
10     public function store_file(Request $request){
11         // Validate the request to ensure a file is provided
12         $request->validate([
13             'photo-file' => 'required|file|max:2048', // Adjust the max size as per your requirements
14         ]);
15
16         // Get the uploaded file
17         $recv_file = $request->file('photo-file');
18
19         // Define the destination path in the public folder
20         //$destinationPath = 'uploads/profilePic';
21         $destinationPath = public_path('uploads/profilePic');
22
23         if (!File::exists($destinationPath)) {
24             File::makeDirectory($destinationPath, 0755, true);
25         }
26
27         // Generate a unique file name to avoid overwriting
28         //$fileName = time() . '_' . $recv_file->getClientOriginalName();
29         $fileName=time().'.'.$recv_file->getClientOriginalExtension();
30
31         // Move the file to the public/uploads directory
32         $recv_file->move(public_path($destinationPath), $fileName);
33
34         // Return a success response with the file path
35         return response()->json([
36             'success' => true,
37             'message' => 'File uploaded successfully!',
38             'file_path' => asset($destinationPath . '/' . $fileName),
39         ]);
40     }
41 }
42 }
43
```

৩. POSTMAN থেকে ফাইল পাঠাব (বা, FORM থেকে আপলোড হয়।)

যদি ডেইট ওয়াইস নতুন ফোল্ডার তৈরি করতে চায় এবং ডাটা আপলোড করতে চায়:

```
1 Route::post('/utsab/date',[RequestController::class,'store_day_wise_file']);
```

```
1 public function store_day_wise_file(Request $request){
2     // Validate the request to ensure a file is provided
3     $request->validate([
4         'photo-file' => 'required|file|max:2048', // Adjust the max size as per your requirements
5     ]);
6
7     // Get the uploaded file
8     $receive_file = $request->file('photo-file');
9
10    // Create a dynamic folder name based on the current date (e.g., '12_4_2024')
11    $dateFolder = date('d_m_Y');
12    $destinationPath = public_path('uploads/profilePic/' . $dateFolder);
13
14    // Ensure the directory exists or create it
