এখানে আমরা POSTMAN থেকে ডাটা পাঠাব:

- እ.Header
- ২.ডাট(JSON/FORM DATA)
- ৩.URL এ ডাটা পাঠাব

## ১. URL তৈরি করলাম।

```
c?php

use Illuminate\Support\Facades\Route;
use App\Http\Controllers\FormController;
use App\Http\Controllers\RequestController;

Route::get('/', function () {
    return view('welcome');
});

Route::post('/utsab/{wife}/{child}',[RequestController::class,'show_all_data']);

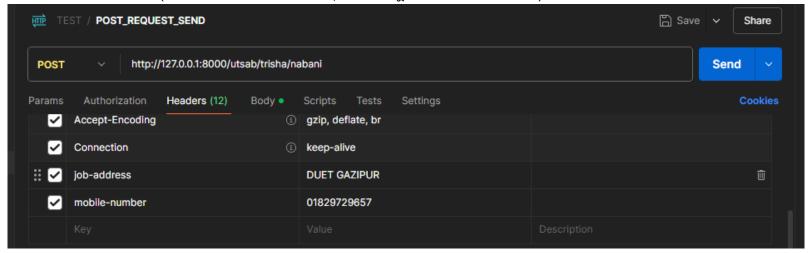

Route::post('/utsab/{wife}/{child}',[RequestController::class,'show_all_data']);

13
14
```

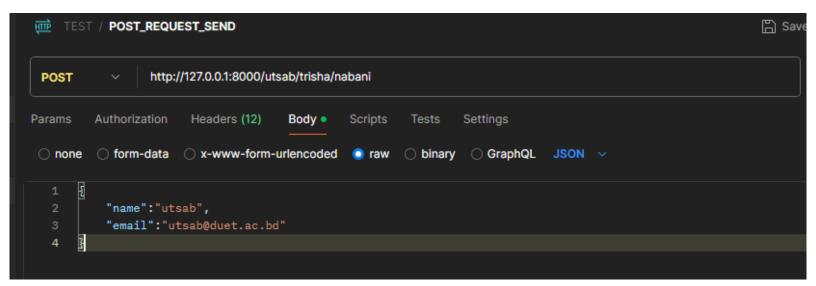

```
<?php
    namespace App\Http\Controllers;
    use Illuminate\Http\Request;
    class RequestController extends Controller
    {
        public function show all data(Request $request){
            //$wife=$request->route('wife');
10
            $wife=$request->wife;
11
            //$child=$request->route('child');
12
            $child=$request->child;
13
            //JSON Body Recive
14
            //It can be form-data(key-value pair)
15
            $name=$request->input('name');
16
            $email=$request->input('email');
17
            $job_address=$request->header('job-address');
18
            $mobile number=$request->header('mobile-number');
19
20
            return response()->json([
21
                 "wife"=>$wife,
22
                 "child"=>$child,
23
                 "name"=>$name,
24
                 "email"=>$email,
25
                 "job_address"=>$job_address,
26
                 "mobile number"=>$mobile number
27
28
            ]);
29
    }
30
31
```

3.URL এ ডাটা পাঠালাম trisha, nabani

Header এ ডাটা পাঠালাম(ডিফল্টলি ৮ টা ফিল্ড থাকে , আরও নতুন ২টি ডাটা পাঠালাম।)

## 8.json data পাঠালাম।

## ৫.ফাইনাল আউটপুট

```
